Who Is This Program For

This course is suited for people from various backgrounds and professions including:

Beginners/Novices: Individuals with little to no prior experience in software development who are eager to learn the fundamentals and build a solid foundation.

Students: Those pursuing degrees in computer science, information technology, or related fields seeking to complement their academic studies with practical skills.

Career Switchers: Professionals from diverse industries looking to transition into a career in software development, bringing their unique experiences and perspectives to the field.

Entrepreneurs: Individuals aiming to develop technical proficiency to build and manage their own software projects or startups.

Tech Professionals: Those already working in the technology sector (e.g., IT support, networking) seeking to expand their expertise into software development.

Freelancers: Individuals interested in offering software development services as freelancers, providing customized solutions to clients.

Note

No coding experience is required to enrol for this course. We start you from beginner level and spend 12 months transforming you into a frontend Developer.

However some basic knowledge of Computer navigation and keyboarding skill is required

\$3,500

Upfront Payment

- 100% Payment, 1 week before start date
- \$100 discount
- Course Registration is FREE

Instalment Payment

- Made in Negotiated Installments
- Course Registration is FREE

Tools and Resources

Curriculum

This curriculum has been meticulously crafted to empower learners with the essential skills and knowledge required to thrive in the dynamic world of frontend engineering. From foundational principles to cutting-edge frameworks, each module is designed with industry standard and best practices in mind, to foster a comprehensive understanding of frontend development, equipping you for any space you find yourself

| Module | Course Content |
|--------|---------------------------------------|
| 1 | Web Fundamentals |
| 2 | Setting Up Development Environment |
| 3 | HTML |
| 4 | CSS |
| 5 | Bootstrap |
| 6 | Tailwind CSS |
| 7 | Class Projects |
| 8 | Git and Git Hub |
| 9 | Javascript |
| 10 | React JS |
| 11 | React Native (Mobile App Development) |
| 12 | Deployment |
| 13 | Projects |
| 14 | Interview Preparations |

Student Feedback

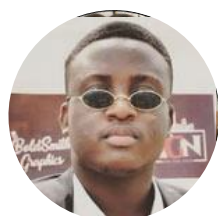

Hannatu Nwosu
10yrs in Banking

I took a bet on myself and decided to branch out of my comfort zone as I have always been fascinated with the engineering of things. Turing Tech exposed me to a world of possibilities that I didn't know existed

Akinotan Oluwasegun
20yrs in Cybersecurity & Infrastructure Mgt

The institute amazingly helped me to connect the dots in different fields of technology and computer science, breaking down complex subjects into simple and implementable solutions

Allen Okosun
Computer Science Graduate

I found a new understanding of basic concepts which further strengthened my foundation as a problem solver. I can now confidently implement concepts taught into my everyday life whether it be my final year or personal projects. The full array of skills gotten in this class is enough to increase my hunger for more knowledge.

Chinanu Ekpere
10yrs in Tech

This is an incredibly engaging class, covering 3 fundamental areas - fundamental concepts in computer science, algorithmic and computational thinking and problem solving using computer science principles. Furthermore, it has afforded me the opportunity to connect with other highly intelligent and well-rounded tech peers
